

## Instructions for Authors

---

### ABOUT

**Dependence Modeling** (DEMO) <http://www.degruyter.com/view/j/demo> is an OPEN ACCESS international journal which aims at providing a medium for exchanging results and ideas in the area of multivariate dependence modeling. It presents articles on fundamental theoretical aspects as well as on significant applications in science, engineering, economics, finance and insurance and other fields. Expository articles are also welcomed, provided that they present the existing literature about a specific topic from new perspectives.

The journal is peer-reviewed through the REFEREE+ program (guidelines at <https://sites.google.com/site/refereeplus/>), in electronic-only format. The language of the journal is English.

### ELECTRONIC SUBMISSION

For submissions we accept exclusively PDF files. The manuscripts must be prepared in one of the following formats: LaTeX, AMSTeX, AMSLaTeX.

All submissions to DEMO must be made electronically via Editorial Manager - an online submission and peer review system at <http://www.editorialmanager.com/depmo/>.

First-time users must create an Author account to obtain a user ID and password required to enter the system. All manuscripts receive individual identification codes that should be used in any correspondence with regard to the publication process. For the authors already registered in Editorial Manager it is enough to enter their username, password and to log in as author ("Author Login" button). If you experience difficulties with the manuscript submission website, you can send the pdf of your article directly to [demo.editorial@degruyteropen.com](mailto:demo.editorial@degruyteropen.com).

All authors of the manuscript are responsible for its content; they must have agreed to its publication and have given the corresponding author the authority to act on their behalf in all matters pertaining to publication. The corresponding author is responsible for informing the coauthors of the manuscript status throughout the submission, review, and production process.

### FINAL SUBMISSION

If your article has been accepted for publication, before sending the final LaTeX/AMSTeX/AMSLaTeX file of your paper the corresponding author should:

- check and update the references where possible (preprint and working paper which have been accepted during the revision process) and make sure the bibliography is contained in the TeX/LaTeX file (i.e. without reference to any external .bib file). References should be listed alphabetically and Journal names should be written in abbreviated form according to Mathematical Reviews Serials Abbreviations, see <http://www.ams.org/msnhtml/serials.pdf>. For in-press references or preprint we suggest to indicate a web address where to download the paper or a DOI number if available. Provide the graphical elements accompanying the manuscript (figures, pictures, etc.) as separate files in .eps or .pdf format.
- check that the paper includes abstract, keywords (separated by commas), the AMS Mathematics Subject Classification number(s) (<http://www.ams.org/mathscinet/msc/>) and (at least) the email address of the corresponding author.
- put Acknowledgments as a separate section at the end of the manuscript
- restrict the use of footnotes (when possible put them in the text).
- make sure that your manuscript is clearly and grammatically written in English.

## SUBMISSION OF REVISED ARTICLES

When a major revision of a manuscript is suggested, authors are expected to deliver the revised version of the manuscript within 3 months (1 month in the case a minor revision is suggested). Along with the major/minor revision the authors should also provide a point by point explanation of how the issues raised by the referees have been handled and a brief evaluation of each report received on the paper. The manuscript should be uploaded directly to the Editorial Manager as an answer to the Journal Editor's decision (and not as a new manuscript). If the above mentioned deadlines are not met, the manuscript will be treated as a new submission.

## OUTLINE OF THE PRODUCTION PROCESS

Once an article has been accepted for publication, the manuscript files are transferred into our production system to be language-edited and formatted. Language and technical editors reserve the privilege of editing manuscripts to conform with the stylistic conventions of the journal. Once the article has been typeset, PDF proofs are generated so that authors can approve all editing and layout.

## PROOFREADING

Proofreading should be carried out once a final draft has been produced. Since the proofreading stage is the last opportunity to correct the article to be published, the authors are requested to make every effort to check for errors in their proofs before the paper is posted online.

Authors may be asked to address remarks and queries from the language and/or technical editors. Please note that language/technical editors do not query at every instance where a change has been made. It is the author's responsibility to read the entire text, tables, and figure legends, not just items queried.

Corresponding author receives e-mail notification when a PDF file is available and should return the comments within 2 working days of receipt. Comments must be submitted via the Editorial Manager system at <http://www.editorialmanager.com/depmo/>.

## ONLINE PUBLICATION

The manuscripts are considered to be ready for publication online when the final proofreading has been performed by authors, and all concerns have been resolved. Manuscripts are published online in advance of their publication in a fully assembled online and printed issue and are given a Digital Object Identifier (DOI), which allows the article to be cited and tracked before it is allocated to an issue. After print publication the DOI remains valid and can continue to be used to cite and access the article.

## TRANSFER OF COPYRIGHT AGREEMENT

All authors retain copyright, unless – due to their local circumstances – their work is not copyrighted. The non-commercial use of the article will be governed by the Creative Commons Attribution-NonCommercial-NoDerivs license as currently displayed on <http://creativecommons.org/licenses/by-nc-nd/3.0/>, except that sections 2 through 8 below will apply in this respect and prevail over all conflicting provisions of such license model. Without prejudice to the foregoing, the author hereby grants the Journal Owner the exclusive license for commercial use of the article (for U.S. government employees: to the extent transferable) according to section 2 below, and sections 4 through 9 below, throughout the world, in any form, in any language, for the full term of copyright, effective upon acceptance for publication. A properly completed LICENSE TO PUBLISH Agreement, signed by the Corresponding Author on behalf of all the authors, must be provided for each submitted manuscript as a condition of publication. A form can be downloaded from the journal's webpage. Authors are asked to submit a scanned copy of the signed original via the Editorial Manager system at <http://www.editorialmanager.com/depmo/>.
