https://doi.org/10.1515/noise-2022-0006

https://doi.org/10.1515/noise-2022-0008

https://doi.org/10.1515/noise-2022-0007

https://doi.org/10.1515/noise-2022-0152
https://doi.org/10.1515/noise-2022-0153

https://doi.org/10.1515/noise-2022-0154

[12] Integrating a parametric tool in design process to improve the acoustic behavior of the asphalt finishing materials: A case study for housing typologies for low- and middle-income residents. 
https://doi.org/10.1515/noise-2022-0157

https://doi.org/10.1515/noise-2022-0156

[14] A renewed perception of living environments after restrictions due to pandemic in Italy. 
https://doi.org/10.1515/noise-2022-0155

https://doi.org/10.1515/noise-2022-0161

https://doi.org/10.1515/noise-2022-0159

[17] Extra-auditory effects of noise exposure in Italian schools: noise levels in external areas. 
https://doi.org/10.1515/noise-2022-0160

[18] Evaluation of change in heart rate variability due to different soundscapes. 
https://doi.org/10.1515/noise-2022-0158

[19] Pockets of quiet characterization in the historical center of Florence (Italy). 
https://doi.org/10.1515/noise-2022-0162

https://doi.org/10.1515/noise-2022-0163
# Table of Contents 2021 vol. 8

[1] **GIS-based mapping of noise from mechanized minerals ore processing industry.**
https://doi.org/10.1515/noise-2021-0001

https://doi.org/10.1515/noise-2021-0002

[3] **The Quiet Project – UK Acoustic Community’s response to COVID19 during the easing of lockdown.**
https://doi.org/10.1515/noise-2021-0003

[4] **On the multipath effects due to wall reflections for wave reception in a corner.**
https://doi.org/10.1515/noise-2021-0004

[5] **A survey on the soundscape perception before and during the COVID-19 pandemic in Italy.**
https://doi.org/10.1515/noise-2021-0005

[6] **Effect of COVID-19 pandemic on festival celebrations and noise pollution levels.**
https://doi.org/10.1515/noise-2021-0006

[7] **Validation of the sonAIR aircraft noise simulation model.**
https://doi.org/10.1515/noise-2021-0007

[8] **Noise complaints during a pandemic: A longitudinal analysis.**
https://doi.org/10.1515/noise-2021-0008

[9] **Effects of COVID-19 outbreak on the sound environment of the city of Milan, Italy.**
https://doi.org/10.1515/noise-2021-0009

[10] **Innovative techniques for the improvement of industrial noise sources identification by beamforming.**
https://doi.org/10.1515/noise-2021-0010

https://doi.org/10.1515/noise-2021-0011

[12] **Rio de Janeiro noise mapping during the COVID-19 pandemic period.**
https://doi.org/10.1515/noise-2021-0012
