GENERAL INFORMATION

The objective of „*Oceanological and Hydrobiological Studies*”, an international journal published by the University of Gdańsk in cooperation with the Academic Publishing Company Springer Verlag, is to provide the most comprehensive and reliable source of information on the current knowledge in the fields of science related to both oceanology and hydrobiology. The main emphasis is on publishing high quality articles, easily available to scientists from all over the world. As an editorial team, we are convinced that „*Oceanological and Hydrobiological Studies*” will continue to grow as a journal meant for scientists and researchers who wish to keep abreast of the latest developments in these fields of science.

Categories of contributions

Original research papers – should contain the results of experimental, empirical field data and/or theoretical studies that have not been previously published elsewhere, except in the form of a preliminary communication (reprint requested).

Short communications – like original research papers, should also contain original results, but must be narrowly focused; brief descriptions of research that is sufficiently time sensitive to warrant a rapid communication.

Reviews – should contain a critically written discussion of results from studies on a particular topic or a group of related topics; reviews may also provide the readers with an insightful introduction to new and groundbreaking areas of research.

Book reviews – the Author should provide a critical evaluation of the work within his/her literary genre or academic discipline.

Submission of a manuscript via an electronic review system will let you keep track of the status of your article, and any changes will be automatically notified by e-mail.

Submission of the manuscript

See detailed information contained in “*Instructions for Authors – EM System usage*” available [here](#).

You can also send us a manuscript in the traditional mail way:

1. Prepare:

- Paper copy of a manuscript as one full printed double-spaced copy (double space all lines, including references, tables and figure legends).
- Complete electronic material.
- Cover letter to Editor-in-Chief

2. Send all to:

Oceanological and Hydrobiological Studies
Faculty of Oceanography and Geography UG
al. Pilsudskiego 46 p. 22
81-378 Gdynia
POLAND

Very important:

1. Electronic and printed versions must be identical.
2. The publisher cannot take responsibility for loss or damage of mailed materials, so the author should keep a backup copy of the manuscript.

Copyrights

Submission of a manuscript implies that it has been read and approved by all co-authors, and authors assign exclusive copyrights to the Editorial Office if and when the manuscript is accepted for publication. The corresponding author must verify that the manuscript, including related data, figures and tables, has not been previously reported or published, that the manuscript is not under consideration elsewhere, and that it will not be submitted elsewhere while under review by the OandHS. If the manuscript is a revised version of the manuscript previously rejected by "*Oceanological and Hydrobiological Studies*" the author must inform the editor about the previous submission in the cover letter and explain in detail the changes that have been made.

Authors have the right to post and update their original manuscript submission on e-print servers, but we request they mention to which OandHS issue the article has been submitted. Files prepared and formatted by *Oceanological and Hydrobiological Studies* should not be posted on reprint servers. Authors may also make and distribute copies of all or parts of their chapters for non-commercial purposes. For use of all or part of any material published by *Oceanological and Hydrobiological Studies* by anyone other than the author, permission must be obtained from the Editorial Office via e-mail.

Very important:

1. Electronic form of "Author agreement" is available here.
2. Join signed form (photo, scan) when submit the article (without it the manuscript can not be subjected to further evaluation) and posting a printed copy to the Editorial Office address by regular mail.

PREPARATION OF THE MANUSCRIPT

Manuscript format

The manuscript should include: Title Page, Abstract, Keywords, Main text of the article with Introduction, Materials and Methods, Results, Discussion, Conclusion (optional), Acknowledgments (optional), References, Figures or other Illustrations, Tables, Tables and/or Figures legend.

- Use double-spacing throughout the whole text.
- Pages should be numbered consecutively.
- Please write your text in 12-point font.

Title Page

The title page must contain the full title, running title and key words.

Very important:

Due to the review system (double blind) adopted by the Editorial in which authors and reviewers remain anonymous, **front page does not contain any information identifying the author!** (i.e., name, last name, affiliation, etc.). All this information is inserted during registration of your manuscript in the EM system.

Keywords

Provide 4 to 8 key words.

Abstract

A short abstract, consisting of not more than 200 words, should be submitted on a separate page. It should not include repetition of the title, literature references or illustrations. An abstract of Original Research should indicate the scope of the report, the methods used, and the main results. An abstract of a Review Paper should indicate the scope and the main points of the article.

Introduction

This contains a formulation of the subject, a statement on the current stage of development of the subject with leading references, and a clear definition of the article's aim.

Materials and Methods

This section contains a description of the procedures employed; it must be sufficiently detailed to enable other researchers to repeat them.

Results

This section describes only the results obtained during the research presented in the article. Results and discussion may be combined or kept separate, and may be further divided by subheadings.

Discussion

This section compares the author's/authors' results with those of other researchers and explains theoretical and logical aspects of the problem in question, deductions and conclusions. Conclusions should be included at the end of discussion or as a separate section, in accordance with the stated aim of the paper.

Acknowledgements

State source(s) of support in the form of grants, equipment, etc. Authors may include other appropriate acknowledgements (for example, to other scientists for their help or advice).

Literature cited in text

- References and citations of articles and books should be limited to published work or work in press and should be indicated in the text by the name(s) of the author(s) and the year of publication as follow (Higler 1986), (White, Morgan 1999) or to indicate authorship for two authors use ampersand (&) e.g. White&Black (1994); for more than two authors use et al.: (Smith et al. 1989). Papers by the same author published in the same year should be distinguished by small letters of the alphabet added after the year (Marshall 1999a), (Marshall 1998; 1999a,b). Do not use author's initials text citations unless necessary to distinguish two authors of the same surname.

- References to unpublished observations, personal communications, papers in preparation (not in press), should be cited as follow: (E. Wilk-Woźniak, unpublished observations (personal communications, paper in preparation, etc.)). Include all authors in these citations – do not use et al. Don't list them as references!

Citations in References

This part describes standards for preparing the references in the APA style. OandHS use EM's 'Reference Checking' tool, which automatically checks the validity of references listed in each manuscript's bibliography (See details in "Instructions for Authors – EM System usage" available [here](#)).

Note: References list must be prepared as a separate file.

The following sections give detailed instructions on citing books, journal articles, newspaper articles, conference papers, theses, webpages and others. Please provide all the required elements in the references to your paper. Please pay particular attention to spelling, capitalization and punctuation. Accuracy and completeness of references are the responsibilities of the author. Before submitting your article, please ensure you have checked your paper for any relevant references you may have missed. A complete reference should give the reader enough information to find the relevant article.

Reference Checking will attempt to find each publication's citation in PubMed and/or CrossRef. However, Reference Checking will not search for books or in press articles, as these texts are not listed in PubMed or CrossRef. If the Reference Checking tool is able to find the citation in PubMed and/or CrossRef, a link to that citation is created.

If the Publication has Reference Checking enabled, Authors will see a link that says 'View Reference Checking Results'. Clicking on the 'View Reference Checking Results' link will allow the Author to see the results of the reference check. If the bibliographic entry is listed and 'Validated', then the reference checker was able to find a match in either PubMed, Cross Ref or both. If the entry is listed as 'Not Validated', the reference checker was not able to locate the citation in CrossRef or Pubmed.

Publication citations that cannot be matched with an entry in either PubMed or Cross Ref will be listed as either 'Not Validated', meaning the tool views the citation as a Journal reference but cannot locate it on PubMed or CrossRef OR as Not Checked, meaning the citation does not appear to be from a Journal.

Note: Authors should view the Reference Checking Results and attempt to resolve any problems with references prior to submitting.

APA style reference list

This section comprises a complete list of all works cited in the text. All authors' names up to 5 should be given. The abbreviation „et al.” should be used for papers with more than 5 authors and following the first 5 names. Please provide the first and the last pages for excerpts from journals, books, etc. In references to books, bulletins and reports, give the number of pages, the city and the publisher. If a paper is written in a foreign language, give the title in English and indicate the language in which the paper is written at the end of the reference as follows: (In Polish). If the paper has an English summary add (English summary). For references starting with the same surname and initials, list single-author works first, in chronological order; list two-author works second, in alphabetical order of the second author, then chronologically; list multi-author works third, arranged only chronologically:

Higler, F. (1999).
Higler, F., Morgan J. (1989).
Higler, F., Vested. K. (1983a).
Higler, F., Vested. K. (1983b).
Higler, F., King L., Evans R., Eliot W. (1987).
Higler, F., Evans R., and King. L. (1990).

1. Book

a. Book (one author)

Format: Author. (Year of publication). *Book title*. Place of publication: Publisher.

Example: Baxter, R. (1982). *Exactly Solvable Models in Statistical Mechanics*. New York: Academic Press.

b. Book (two or more authors)

Format: Author1, Author2 & Author3. (Year of publication). *Book title*. Place of publication: Publisher.

Example: Kleiner, F.S., Mamiya C.J. & Tansey R.G. (2001). *Gardner's art through the ages* (11th ed.). Fort Worth, USA: Harcourt College Publishers.

c. Book chapter or article in an edited book

Format: Author(s) of a chapter. (Year of publication). Chapter title. In Editors of the book (Eds.), *Book title* (Chapter page range). Place of publication: Publisher.

Example: Roll, W.P. (1976). ESP and memory. In J.M.O. Wheatley & H.L. Edge (Eds.), *Philosophical dimensions of parapsychology* (pp. 154-184). Springfield, IL: American Psychiatric Press.

d. Conference proceedings

Format: Author(s). (Year of publication). Title. In Conference name, Date (Page range). Place of publication: Publisher.

Example: Field, G. (2001). Rethinking reference rethought. In Revelling in Reference: Reference and Information Services Section Symposium, 12-14 October 2001 (pp. 59-64). Melbourne, Victoria, Australia: Australian Library and Information Association.

e. ebook

Format: Author(s). (Year of publication). *Title*. Publisher. Retrieving date, http address. DOI.

Example: Johnson, A. (2000). *Abstract Computing Machines*. Springer Berlin Heidelberg. Retrieved March 30, 2006, from SpringerLink <http://springerlink.com/content/w25154>. DOI: 10.1007/b138965.

f. Thesis

Format: Author(s). (Year of publication). *Title*. Information, Place of publication.

Example: Begg, M.M. (2001). *Dairy farm women in the Waikato 1946-1996: Fifty years of social and structural change*. Unpublished doctoral dissertation, University of Waikato, Hamilton, New Zealand.

g. Report

Format: Author(s). (Year of publication). *Title*. Place of publication: Publisher. (Report number)

Example: Osgood, D.W., & Wilson J.K. (1990). *Covariation of adolescent health problems*. Lincoln: University of Nebraska. (NTIS No. PB 91-154 377/AS)

h. Government publication

Format: Institution name. (Year of publication). *Title*. Place of publication: Publisher.

Example: Ministerial Council on Drug Strategy. (1997). *The national drug strategy: Mapping the future*. Canberra: Australian Government Publishing Service.

2. Article

a. Journal Article (one author)

Format: Author. (Year of publication). Article title. *Journal Title*. Volume (issue): range of pages. DOI.

Example: Nikora, V. (2006). Hydrodynamics of aquatic ecosystems: spatial-averaging perspective. *Acta Geophysica* 55(1): 3-10. DOI: 10.2478/s11600-006-0043-6.

b. Journal Article (two or more authors)

Format: Author1, Author2 & Author3. (Year of publication). Article title. *Journal Title*. Volume (issue), range of pages. DOI

Example: Cudak, M. & Karcz J. (2006). Momentum transfer in an agitated vessel with off-centred impellers. *Chem. Pap.* 60(5): 375-380. DOI: 10.2478/s11696-006-0068-y.

c. Journal article from an online database

Format: Author(s). (Year of publication). Article title [Electronic version]. *Journal Title*. Volume (issue), range of pages. Retrieved date of access, from name of database. DOI.

Example: Czajgucki Z., Zimecki M. & Andruszkiewicz R. (2006, December). The immunoregulatory effects of edeine analogues in mice [Abstract]. *Cell. Mol. Biol. Lett.* 12(3): 149-161. Retrieved December 6, 2006, from PubMed database on the World Wide Web: <http://www.pubmed.gov>. DOI: 10.2478/s11658-006-0061-z.

d. Newspaper article (no author)

Format: Article title. (Publication date). Journal Title. page.

Example: Amazing Amazon region. (1989, January 12). New York Times, p. D11.

e. Encyclopedia article

Format: Author. (Year of publication). Article title. In Encyclopedia title (volume number, pages). Place of publication: Encyclopedia name.

Example: Bergmann, P.G. (1993). Relativity. In *The new Encyclopedia Britannica* (Vol. 26, pp. 501-508). Chicago: Encyclopedia Britannica.

3. Other formats

a. Webpage

Format: Author/Sponsor. (last update or copyright date). *Title*. Retrieved date of access, from URL.

Example: Walker, J. (1996, August). *APA-style citations of electronic resources*. Retrieved November 21, 2001, from <http://www.cas.usf.edu/english/walker/apa.html>

b. Lecture note

Format: Author(s). (Date of presentation). *Lecture title*. Lecture notes distributed in the unit, at the name of the teaching organization, the location.

Example: Liffers, M. (2006, August 30). *Finding information in the library*. Lecture notes distributed in the unit Functional Anatomy and Sports Performance 1102, University of Western Australia, Crawley, Western Australia

c. Patent

Format: Author. (Year). Patent number. Location. Issue body.

Example: Smith, I. M. (1988). U.S. Patent No. 123,445. Washington, D.C.: U.S. Patent and Trademark Office.

d. Standard

Format: Issue body. (Year). Standard name. Standard number. Location.

Example: Standards Association of Australia. (1997). Australian standard: Pressure equipment manufacture. AS4458-1997. North Sydney.

e. Video

Format: Producer, P.P. (Producer), & Director, D.D. (Director). (Date of publication). Title of motion picture [Motion picture]. Country of origin: Studio or distributor.

Example: Zhang, Y. (Producer/Director). (2000). Not one less [Motion Picture].China: Columbia Pictures Industries, Inc.

f. Audio recording

Format: Songwriter, W.W. (Date of copyright). Title of a song [Recorded by an artist if different from a song writer]. On Title of album [Medium of recording]. Location: Label. (Recording date if different from a copyright date).

Example: Taupin, B. (1975). Someone saved my life tonight [Recorded by Elton John]. On Captain fantastic and the brown dirt cowboy [CD]. London: Big Pig Music Limited.

g. Mailing list

Format: Author. (Exact date of a posting). Subject line of a message. Message posted to followed by a name of a mailing list, archived at followed by an address of the archived version of the message

Example:

Hammond, T. (2000, November 20). YAHC: Handle Parameters, DOI Genres, etc. Message posted to Ref-Links electronic mailing list, archived at <http://www.doi.org/mail-archive/ref-link/msg00088.html>

h. Computer software

Format: Author(s). (Year). Title [computer software]. Location: Company.

Example: Ludwig, T. (2002). PsychInquiry [computer software]. New York: Worth.

Note: Please, use DOI number if possible!

About DOI

Digital Object Identifier (DOI): The DOI identification system for digital media has been designed to provide persistent and reliable identification of digital objects. Information on the DOI and its governing body, the International DOI Foundation, can be found at <http://www.doi.org>. In the editions of OandHS papers, the DOI appears at the top of the first page in its PDF version; in the printed editions, the DOI appears at the same location as in the PDF version.

Figures, Photographs and Tables

Note: Electronic versions of figures should be submitted as separate files! Not attached to the text file.

Oceanological and Hydrobiological Studies has an option EM's Artwork Quality Checking (AQC) system enabled. Figures submitted to the Publication will be processed through AQC. The AQC system analyzes the artwork, and provides the results back to the Editorial Manager. These results are then made available to the Author and/or the Editor on designated pages. (See details in "**Instructions for Authors – EM System usage**" available [here](#)).

Figures and/or Tables legends should be fully explanatory. Be sure to explain all abbreviations used. Whenever possible, the information in Tables should instead be presented in a Figure. All tables and figures should be cited in the text consecutively.

You can send us color and black & white graphics but most figures are submitted as black & white in the printed version of *Oceanological and Hydrobiological Studies*, color graphics

could be used in the online version of the manuscript. For color figures printed in hardcopy of OandHS, contact the Editorial Staff.

Photos and figures

They should be of high quality (a minimum resolution of 300 dpi, preferably in the format TIFF, **JPG**, **GIF**, BMP, WPG). Legends, if required, should be an integral part of figures. All figures should not require additional processing. Printed photographs must show good contrast and be accompanied by their electronic versions saved as high-resolution TIFF, GIF, BMP or JPG files.

All figures must be referred to in the text, e.g. (Fig. 1) in their ascending order. A written copyright permission must be obtained for any graphics already published elsewhere in the same form. The source of the material should be credited at the end of the figure legend. The copyright holder may specify the exact language to be used.

Tables

They should not duplicate the text. Tables should be planned to a maximum size of 12 × 18 cm (for bigger ones please contact the editorial staff). Footnotes to tables should be indicated by lower-case superscript letters, beginning with a), b), c), etc. in each table. Titles for each table should enable the reader to understand the data without referring to the text. All tables must be referred to in the text, e.g. (Table 1) in their ascending order. A written copyright permission must be obtained for any tables already published elsewhere in the same form.

Numerals and Units of Measure

Please use only the international system of units (SI).

Use thousand million instead of billion or use 10⁹. Run together numbers with up to four digits (i.e. 1000 and not 1,000 or 1 000). Numbers with more than four digits should be given as, for example, 10 000 or 100 000 (and not 10,000 or 100,000).

Use the decimal point: 1.25. Metric and Celsius units must be used. Use the expression: km hr⁻¹ not km/hr or km per h, g l⁻¹ not gm per liter. Use a space between a numeral and an unit of measure, exception is degree, percent and Svedberg (5°C, 5%, 5S). Specialized technical or scientific terms, abbreviations and acronyms should be explained the first time they are used.

Italicization

Italicize:

- species and varieties, but not classes, orders and families.
- scientific names of bacteria and protozoa
- p, o, m, n, cis, sec, sic, trans, syn in chemical names
- genes, genotypes, loci, markers, mutants, alleles, operons
- mathematical variables

Genus-species names

These should be typed in italics except Author(s) name, e.g. *Cladophora albida* (Hudson) Kützing. Spell out full generic and specific names on the first use: *Enteromorpha linza*. Thereafter, the genus name may be abbreviated to the first letter: *E. linza*. If the name appears frequently and may be confused with another genus whose first letter is the same, spell both names out every times. Never abbreviate generic names when used alone; also, do not

abbreviate a species name when a subspecies is recognized. For example: *B. thuringiensis israelensis*, not *B. t. israelensis*.

Abbreviations

Use abbreviations sparingly and only if terms are repeated frequently. Define all but the obvious standard symbols and abbreviations when first mentioned in the text, these should be expanded in parentheses. Avoid using nonstandard abbreviations in titles and headings.

Mathematical symbols and variables

Except for function names, numbers, Greek letters and parentheses, these should be printed in italics. Equations should be numbered with Arabic numerals consecutively throughout the text: these numbers should be placed in parentheses on the right hand margin.

Special characters

Use the following order for brackets: {[()]}.

Footnotes

These should be avoided if possible. However, if deemed absolutely essential, footnotes should be indicated by superscript numbers in the text and placed at the foot of the page to which they apply. They should be numbered throughout the text consecutively.
