DESCRIPTION

A sustainable agriculture system is required for fulfilling the demand for a nation's food, feed, fiber, and energy. Sustainable agriculture cannot be achieved without strong applied research. Through applied research is growing out from the basic research but it helps in discovering various ways to improve the quality, quantity, and safety of agricultural products. The objective of this research will be the creation of agricultural systems that are simultaneously productive, economically viable, and environmentally sound.

In this special issue, we intend to invite front-line researchers and authors to submit original research articles, review articles, case reports, short communication and Discussion paper on the applied aspect of research in Agricultural and Biological Sciences.

The subtopics of the Special Issue are as follows:

- ▶ Plant Breeding
- ▶ Crop Management
- ▶ Plant diseases Management
- ▶ Pest Management
- ▶ Animal science and nutrition
- ▶ Microbiology
- ▶ Biotechnology
- ▶ Plant Science
- ▶ Lower plant and animals
