

## **Reviews in the Neurosciences**

### **Information for Authors**

#### **Aims and Scope**

*Reviews in the Neurosciences (Rev. Neurosci.)* provides a forum for reviews, critical evaluations and theoretical treatment of selective topics in the neurosciences. The journal is meant to provide an authoritative reference work for those interested in the structure and functions of the nervous system at all levels of analysis, including the genetic, molecular, cellular, behavioral, cognitive and clinical neurosciences. Contributions should contain a critical appraisal of specific areas and not simply a compilation of published articles.

**Readership** includes: neurologists, psychologists, psychiatrists, neuropharmacologists, neurochemists, neurophysiologists, neuroanatomists, neuroendocrinologists, neurogeneticists and behavioral neuroscientists.

Submission of a manuscript to *Reviews in the Neurosciences* implies that it has not been published before and is not under consideration for publication elsewhere. It is the corresponding author's responsibility to ensure that all authors approve of the manuscript's submission for publication. Once the manuscript is accepted, it may not be published elsewhere without the consent of the copyright holders.

#### **Submission of manuscripts**

Manuscripts may be submitted online at the following URL:

**<https://mc.manuscriptcentral.com/revneuro>**.

#### **Refereeing of manuscripts**

Submitted manuscripts will undergo a peer review process. During online submission, please indicate the names and e-mail addresses of at least three potential referees who are not members of the Editorial Board of this journal. Revised manuscripts must be submitted within eight weeks of the authors' notification of conditional acceptance.

#### **Preparation of manuscripts**

Manuscripts must be written in clear and concise English and should be regarded as final texts as no changes are possible at the proof stage other than correction of printer's errors.

#### **General format**

Manuscripts (including table legends, figure legends and references) should be typed double-spaced with font size of 12 pt letters. Pages should be numbered (with the title page as 1) and have margins of 2.5 cm (1 inch) on all sides. Footnotes in the text should be avoided in favor of parentheses.

#### **Sections**

Manuscripts should be organized into: Title page, Abstract, Key words, Body with subsections (Body may be preceded by an outline of the structure of the review), Acknowledgments, References, Tables and Figure legends.

#### **Title page**

The Title page should include (a) an informative title; (b) names of all authors (with one first name in full for each author), followed by their affiliations (department, institution, city with postal code, country); (c) the mailing address, fax, phone number and e-mail address of the corresponding author; (d) a running title of up to 50 characters. If more than one institution is involved in the work, the authors' names should be linked by superscript consecutive numbers to the appropriate institutions.

If required, small superscript letters should be used to indicate present addresses.

#### **Abstract and Keywords**

The second page of the manuscript should contain the Abstract and the Key words. The Abstract should be a single paragraph of no more than 250 words. Abbreviations and reference citations should be avoided. Below the Abstract provide up to six Key Words, which are not part of the title, listed in alphabetical order and separated by semicolons.

#### **Acknowledgments**

Acknowledgments should be placed at the end of the text. Names of funding organizations should be written in their entirety.

#### **References**

For citations authors are encouraged to rely as far as possible upon articles published in primary research journals. Unpublished results and personal communications should be cited as such within the text; Meeting abstracts may not be cited. Within the text references should be cited by author and date; et al. should be used if there are more than two authors, e.g. (Gerfen and Bolam 2010; Hogan et al. 1986). At the end of the text the citation list should be in alphabetical order. Journal names should be given by employing commonly used abbreviations. Citations should be in accordance with the following examples:

##### **Journal article:**

Nikolaus, S., Mamlins, E., Hautzel, H. and Müller, H.-W. (2019). Acute anxiety disorder, major depressive disorder, bipolar disorder and schizophrenia are related to different patterns of nigrostriatal and mesolimbic dopamine dysfunction. *Rev. Neurosci.* 30: 381–426.

##### **Book chapter:**

Gerfen, C.R. and Bolam, J.P. (2010). The Neuroanatomical Organization of the Basal Ganglia. In: Steiner, H. and Tseng, K.Y. (Eds.). *Handbook of Basal Ganglia Structure and Function*. Elsevier/Academic Press, pp. 3–28.

##### **Book/monograph:**

Hogan, B., Costantini, F., and Lacy, E. (1986). *Manipulating the Mouse Embryo: A Laboratory Manual* (Cold Spring Harbor Laboratory Press, Cold Spring Harbor, USA).

#### **Tables**

Tables should be typed on separate pages and be numbered consecutively using Arabic numerals. A short descriptive title, column headings, and (if necessary) footnotes should make each table self-explanatory. Please indicate in the manuscript the approximate position of each table.

#### **Illustrations**

Electronic files containing illustrations should be provided in a generic graphics format (tif or jpg preferred; use PowerPoint or eps files only if no other format is available). For reproduction, high-resolution (approx. 400 dpi and better) images are required. All figures will be reduced in size to fit, wherever possible, the width of a single column, i.e. 80 mm, or a double column, i.e. 168 mm, of text. Ideally, single column figures should be submitted with a width of 100 mm, double column figures with a width of 210 mm. Lettering of all figures within the article should be uniform in style (preferably a sans serif typeface) and of sufficient size (so that the final height will be approximately 2 mm). Upper-case letters A, B, C etc. should be used to identify individual parts of multipart figures. All figures must be cited in the text in numerical order. Reference to figures is to be made as Figure 1 etc. in the text and captions.

*Color figures:* Authors are encouraged to submit illustrations in color if necessary for conveying their scientific content. Publication of color figures is provided free of charge both in online and print editions.

*Line drawings:* These should also be provided as high-resolution files. No additional artwork, redrawing or typesetting will be done by the publisher. Note the faint shading or stippling may be lost upon reproduction, heavy staining or stippling may appear black.

*Figure legends:* These should be provided on separate, numbered manuscript pages. All symbols and abbreviations used in the figures must be explained, except for standard abbreviations or others defined in the preceding text.

#### **Abbreviations**

No separate list of abbreviations is accepted. Abbreviations and acronyms should be defined parenthetically within the text upon first appearance.

#### **Author photo and short CV**

Authors may submit a portrait photograph and a short scientific CV (4-6 sentences, written in 3rd person singular) for articles with 4 authors or less. Please use the appropriate "file designation" terms for the CV text file(s) and author photograph(s) during online submission. This information will be published in the article after the References section.

**Note:** As per De Gruyter policy, no author list changes are permitted after acceptance of an article. The De Gruyter production team is instructed to enforce this policy during the production/proofing process.

#### **Offprints/PDF files**

The electronic files of typeset articles in Adobe Acrobat PDF format are provided free of charge and are made accessible from the online content website of the journal upon publication. Access details are sent to the e-mail address of the corresponding author. Paper offprints can be ordered in addition during the proof correction process.

#### **Note for authors of NIH-funded research**

Walter de Gruyter Publishers acknowledge that the author of an NIH-funded article retains the right to provide a copy of the final manuscript to NIH upon acceptance for publication or thereafter, for public archiving in PubMed Central 12 months after publication in *Reviews in the Neurosciences*. Note that only the accepted author's version of the manuscript, not the PDF file of the published article, may be used for NIH archiving.

Please contact the journal staff if you have any further questions (e-mail: [RNS@uni-duesseldorf.de](mailto:RNS@uni-duesseldorf.de) or [rev.neurosci.editorial@degruyter.com](mailto:rev.neurosci.editorial@degruyter.com)). We will do our best to assist you.
