RANDOM OPERATORS AND STOCHASTIC EQUATIONS

**Editor/Herausgeber**

Vyacheslav Girko

Profile/Kurzcharakteristik

Random Operators and Stochastic Equations is devoted to the theory of random operators and stochastic analysis. Contributions on theoretical aspects, as well as on physical and technical applications are considered for publication. The scope includes the general theory of linear random operators, the theory of random matrices, chaos in classical and quantum mechanics, stochastic differential equations, Brownian motion theory, neural networks theory, regression analysis, multivariate statistical analysis, systems of linear algebraic equations with random coefficients, spectral decomposition of the solutions of operator stochastic equations, pattern recognition, discriminant analysis and stochastic control theory.

Readership/Leserschaft

Mathematicians and physicists in the relevant sector

Publication Frequency/Erscheinungsweise

4 issues per year
