Structure for Original and Review Articles

Abstract: primary objectives, the research design, methods and procedures, experimental interventions, main outcomes and results as well as conclusions

1. Introduction

The introduction should contain the motivation for the study of the presented research work, including relevant background literature review.

2. Experimental procedure [will be formatted to petit in the typeset article]

This section should address experimental details which are important for the interpretation of the results. Use the simple past tense, e.g. Three specimens were prepared using...

3. Results

This section should only contain results without discussion.

4. Discussion

The results presented in Section 3 should be interpreted here taking into account the whole relevant literature done in this research area.

(If considered appropriate, the Results and Discussion sections can be combined, authors should determine the best way to present their work in this style.)

5. Conclusions

Finally, the main results should be summarized here and key conclusions drawn from them.

When you submit your work, please ensure the following
