JOURNAL OF NON-EQUILIBRIUM THERMODYNAMICS

**Editor / Herausgeber**

Jürgen U. Keller, Karl Heinz Hoffmann

Profile / Kurzcharakteristik

The Journal of Non-Equilibrium Thermodynamics serves as an international publication organ for new ideas, insights and results on non-equilibrium phenomena in science, engineering and related natural systems. The journal addresses mechanical, chemical, and biochemical engineers, physicists, chemists and applied mathematicians, as well as computational scientists. Contributions should present novel approaches to analyzing, modeling and optimizing processes of engineering relevance such as transport processes of mass, momentum and energy, separation of fluid phases, reproduction of living cells, and many others. Highest priority is given to contributions which add to the basic understanding of non-equilibrium phenomena in engineering and related natural systems.

Readership / Leserschaft

Mathematicians and physicists in the relevant sector

Publication Frequency / Erscheinungsweise

4 issues per year
