Robert Birgeneau was president and professor of physics at the University of Toronto from 2000 to 2004. In 2004 he became chancellor of the University of California, Berkeley. He carries out research on the effects of disorder, dimensionality, and correlations in materials, especially in quantum many body solids. He is also broadly interested in science policy and the role of research and education in advanced societies.

David Bloom is the Clarence James Gamble professor of economics and demography of the department of population and international health at Harvard University's School of Public Health. He is also research associate at the U.S. National Bureau of Economic Research in Cambridge, Massachusetts.

Abdallah S. Daar is professor of public health sciences and professor of surgery at the University of Toronto. He is director of the program in applied ethics and biotechnology at the University of Toronto Joint Centre for Bioethics and director for ethics and policy, McLaughlin Centre for Molecular Medicine, University of Toronto.

James Duderstadt is president emeritus and university professor of science and engineering at the University of Michigan. His teaching, research interests, and national service activities span a wide range of subjects including nuclear energy, information technology, science policy, and education policy.

Eva Egron-Polak is secretary-general of the International Association
