RETRACTION NOTICE

Refers to: RETRACTED „The study of lung flow limitations in aerobically trained children” *Human Movement*, Volume 10, Number 2, 2009, pages 96–108

The following article from *Human Movement* 2009, 10(2), 96–108, „The study of lung flow limitations in aerobically trained children” by Mohsen Ghanbarzadeh, Abdolhamid Habibi, Masoud Nikbakhat, Gholamhosain Ebadi, Hossein Poursoltani has been retracted at the request of authors and the American Physiological Society (APS).

Reason: The author has plagiarized a paper that had already appeared in *Journal of Applied Physiology* 2005, 99, 1912–1921, doi:10.1152/jappphysiol.00323.2005, “Exercise flow-volume loops in prepubescent aerobically trained children” by Cedric Nourry, Fabien Deruelle, Claudine Fabre, Georges Baquet, Frederic Bart, Jean-Marie Grosbois, Serge Berthoin, and Patrick Mucci. One of the conditions of submission of a paper for publication is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. As such, this article represents a severe abuse of the scientific publishing system. We apologize to the authors of the original article and the editors of the *Journal of Applied Physiology* for this unfortunate occurrence, and thank the American Physiological Society for drawing the matter to our attention. We apologize also to the readers of both journals that this was not detected earlier during the submission process and deeply regret any inconvenience caused due to this incident.
