What is your idea about using corticosteroids in the management of HELLP syndrome for alleviation of maternal disease manifestations and complications?
(Please choose only one answer)
   Agree
   Neutral
   Disagree
For which of the following indications do you use corticosteroids in mothers with HELLP syndrome? (you may choose more than one)
(You may make one or many selection)
  - Fetal lung maturation
  - Extremely low maternal platelets
  - Extremely elevated maternal liver enzymes
  - Decreased maternal urinary output

What is your idea about routinely using corticosteroids for fetal lung maturation in the management of fetal growth restriction?
(Please choose only one answer)
  - Agree
  - Neutral
  - Disagree

What is your idea about routinely using corticosteroids for fetal lung maturation in the management of preeclampsia?
(Please choose only one answer)
  - Agree
  - Neutral
  - Disagree

What is your idea about routinely using corticosteroids for fetal lung maturation in the management of fetal growth restriction + preeclampsia?
(Please choose only one answer)
  - Agree
  - Neutral
  - Disagree

What is your idea about routinely using corticosteroids for fetal lung maturation in the management of HELLP syndrome?
(Please choose only one answer)
  - Agree
  - Neutral
  - Disagree
What is your idea about routinely using corticosteroids for fetal lung maturation in the management of fetal growth restriction + HELLP syndrome?
(Please choose only one answer)
- Agree
- Neutral
- Disagree

What is your idea about using corticosteroids in mothers with HELLP syndrome + absent end diastolic flow in the umbilical artery?
(Please choose only one answer)
- Agree
- Neutral
- Disagree

Which of the following corticosteroids do you prefer to use for fetal lung maturation in HELLP syndrome?
(Please choose only one answer)
- Betamethasone
- Dexamethasone
- Prednisolone
- Others

Which of the following corticosteroids do you prefer to use for maternal disease manifestations and complications in HELLP syndrome?
(Please choose only one answer)
- Betamethasone
- Dexamethasone
- Prednisolone
- Others

Two corticosteroid regimens can be used in management of HELLP syndrome?
1) for fetal lung maturation (standard regime)
2) for maternal benefit (high dose regime). For the high dose regime what is your duration of your treatment?

Or
(Please choose only one answer)
- Until significant improvement in laboratory parameters
- Not using high dose regime in this patient group

In HELLP syndrome patients with platelet counts above 100.000 which type of anesthesia do you prefer?
(Please choose only one answer)
- General anesthesia
- Regional (spina/epidural) anesthesia
In HELLP syndrome patients with platelet counts between 50,000 ? 100,000 which type of anesthesia do you prefer?
(Please choose only one answer)
- General anesthesia
- Regional (spina/epidural) anesthesia

In HELLP syndrome patients with platelet counts below 50,000 which type of anesthesia do you prefer?
(Please choose only one answer)
- General anesthesia
- Regional (spinal/epidural) anesthesia

Do you think that corticosteroid can increase the rate of regional anesthesia use in HELLP syndrome patients with its positive effect on platelet counts?
(Please choose only one answer)
- Strongly agree
- Agree
- Neutral
- Disagree
- Strongly disagree
