Call for Book Proposals

Ecosystem Science and Applications (ESA) – A New Series Co-Sponsored by Higher Education Press (HEP) & De Gruyter

The goal of ESA is to publish high quality and timely books on prominent topics in the fundamentals of ecosystem science and its application in addressing global issues facing society today. ESA publications will be targeted to an international audience of scientists and practitioners, while maintaining a strong emphasis on reaching scholars and the general public in China. This will be accomplished by publishing all ESA books in both English and Chinese through a formal collaborative agreement between HEP and De Gruyter. Books will also be offered simultaneously as e-books to facilitate scientific communication.

Currently, HEP and De Gruyter are soliciting scholars interested in editing or authoring books as part of the new ESA book series. If you would like to explore the possibility of participating as a book editor or an author, please contact one of the three Editors-in-Chief:

Dr. Jiquan Chen (jiquan.Chen@utoledo.edu) – University of Toledo

Dr. Heidi Asbjornsen (Heidi.Asbjornsen@unh.edu) – University of New Hampshire

Dr. Kristiina Vogt (kvogt@uw.edu) – University of Washington

Dr. Xueying Zou (zouxy@hep.com.cn) of HEP will serve as the managing editor and can be reached for technical questions.
