Contents

Erich Saling, Monika Dräger, Jens H. Stupin
1 Preface and introduction —— 1

Erich Saling and Monika Dräger
2 Fetal heart activity and measurements of labor activities —— 5
2.1 Scientific precursors —— 5
2.1.1 Development of the stethoscope —— 5
2.1.2 Recognition of the existence of fetal heart sounds —— 5
2.1.3 First attempts to register the fetal heart beats —— 6
2.1.4 Measurement of the intrauterine pressure during labor —— 8
2.2 Early stages: “modern” cardiotocogram (CTG) —— 11
2.3 Later developments —— 18

Erich Saling and Monika Dräger
3 Fetal blood analysis (FBA) —— 23
3.1 Precursors —— 23
3.2 Fetal blood analysis (FBA) —— 23
3.3 Further developments —— 24
3.3.1 Pulse oxymetry —— 25
3.4 Excursion: Physiological concepts in connection with fetal blood analysis —— 25
3.4.1 “Brain sparing effect” —— 25
3.4.2 “Maternogenic” increase of metabolic acidity in the fetus —— 25

Monika Dräger and Erich Saling
4 Amniotic fluid interventions and examinations —— 29
4.1 Knowledge about the significance of meconium in the amniotic fluid —— 29
4.2 Amniocentesis —— 30
4.3 Amnioscopy —— 31

J. Bennebroek Gravenhorst
5 Prevention of Rh-immunization —— 35
5.1 History —— 35
5.1.1 First descriptions and discovery of the pathogenesis —— 35
5.1.2 First exchange transfusions —— 36
5.2 Attemptsto affect the immune system —— 36
5.3 Intrauterine transfusion —— 37
5.4 Rh-immune prophylaxis —— 37
5.5 Later developments —— 38

Asim Kurjak
6 Sonography —— 41
6.1 Ian Donald – Pioneer of ultrasound in obstetrics and gynecology —— 41
6.2 Parallel early developments in the USA, Japan, and Russia —— 45
6.3 The ultrasonic boom in the 1960s —— 46
6.3.1 The development and use of new ultrasound devices: the Vidoson® real-time scanner and articulated-arm compound contact scanner SSD-10 —— 46
6.3.2 The work of Alfred Kratochwil —— 48
6.3.3 The Kossoff group: first use of ultrasound in the diagnosis of fetal malformation and further technical innovations —— 49
6.3.4 Ultrasound in the diagnostics of pregnancy assessment —— 50
6.4 The implementation of Doppler ultrasound —— 52
6.5 Later developments and future perspectives —— 53
6.5.1 The founding of the International Society of Ultrasound in Obstetrics and Gynecology (ISUOG) and the first journal in this field —— 53
6.5.2 From the scan of fetal movements to the diagnosis of fetal well-being due to Doppler ultrasound —— 53
6.5.3 The implementation of 3D ultrasound —— 54
6.5.4 Use of ultrasound in the diagnostics of malformation and preterm delivery —— 55

Amos Grünebaum
7 Measures in cases of threatened prematurity —— 59
7.1 Tocolysis —— 59
7.1.1 Introduction —— 59
7.1.2 Medications for tocolysis —— 59
7.1.3 Later developments – tocolysis today —— 61
7.1.4 Conclusions —— 62
7.2 History of induction of lung maturation —— 62
7.2.1 Antecedent of fetal lung maturation —— 62
7.2.2 Early stages of fetal lung maturation 1940s–1960s —— 63
7.2.3 From 1970s till today —— 63
7.2.4 Conclusion —— 65
Noelia Zork and Mary E. D’Alton  
8 **Diagnosis of genetic defects** —— 69  
8.1 Introduction —— 69  
8.2 Early stages of clinical diagnostics: Fetoscopy versus ultrasound —— 69  
8.3 The implementation of amniocentesis (AC) —— 70  
8.4 The implementation of chorionic villus sampling (CVS) —— 70  
8.5 Later developments in diagnostics: Ultrasound guided CVS and amniocentesis (AC) —— 71  
8.6 Alpha-fetoprotein in maternal serum as non-invasive diagnostic tool —— 73  
8.7 The triple and quadruple screens —— 74  
8.8 The return of ultrasound —— 74  
8.9 The combined screening —— 74  
8.10 New directions: Cell-free DNA (cfDNA) testing in maternal blood and chromosomal microarray —— 75  

Monika Dräger and Erich Saling  
9 **Assessment of the newborn immediately after delivery** —— 79  
9.1 Apgar-score —— 79  
9.1.1 Precursors —— 79  
9.1.2 Apgar-score —— 79  
9.2 Assessment of the biochemical state of the newborn —— 82  
9.2.1 Precursors – chemical and physiological scientific background —— 82  
9.2.2 Blood gas analysis and pH-measurement in the newborn —— 82  
9.2.3 Stanley James and Virginia Apgar —— 83  
9.3 Attempts to modify the Apgar-score and completion of the assessment of the newborn —— 83  

Anne Greenough and Anthony D. Milner  
10 **Neonatological part of perinatal medicine** —— 87  
10.1 Introduction —— 87  
10.2 Resuscitation —— 87  
10.2.1 Precursors in the eighteenth and nineteenth century —— 87  
10.2.2 Beginnings of current neonatal resuscitation practices —— 89  
10.2.3 “Alternative” approaches —— 90  
10.2.4 Scientific comparison of different methods —— 90  
10.2.5 Supplementary oxygen —— 90  
10.2.6 Refilling anesthetic bag —— 91  
10.2.7 Change in pressure limiting valves —— 91  
10.2.8 Later developments and recommendations —— 91
10.3 Mechanical ventilation — 92
10.3.1 Intermittent positive airway pressure — 92
10.3.2 Negative external inhalation — 93
10.3.3 Bronchopulmonary dysplasia — 94
10.3.4 Outcomes of mechanical ventilation — 94
10.3.5 Altering inflation times and rates — 94
10.3.6 Later developments — 96
10.4 Exogenous surfactant therapy — 97
10.4.1 Physiological background — 97
10.4.2 Identification of the chemical structure of surfactant — 97
10.4.3 Methods for assessing surfactant — 98
10.4.4 Hormones and the surfactant system — 99
10.4.5 Surfactant therapy — 99
10.5 Conclusions — 100

Jens H. Stupin
11 History of clinical structures and development of the Perinatal Care System — 105
11.1 Introduction — 105
11.2 Historical precursors of a structural reform — 105
11.2.1 The need for the establishment of antenatal care at the end of the 19th century — 105
11.2.2 John William Ballantyne’s plea for a pro-maternity hospital — 106
11.3 Erich Saling’s proposals for reforms in obstetrics: Early attempts to a structural reform — 108
11.4 International developments as the answer to Saling’s proposals — 109
11.5 Later developments and evolution of an integrative Perinatal Care System — 112

Erich Saling and Monika Dräger
12 History of first activities such as training, publications, foundation of very first congresses and societies — 115
12.1 New section in medicine: First activities — 115
12.2 First local educational activities — 116
12.3 Later developments — 120
# History of the International Academy of Perinatal Medicine (IAPM)

13 History of the International Academy of Perinatal Medicine (IAPM) — 121

13.1 Introduction — 121

13.2 The first steps — 121

13.3 The roots of the Academy — 122

13.4 Foundation of the IAPM — 123

13.5 Identity, mission, and objectives of IAPM — 124

13.5.1 Mission — 124

13.5.2 Objectives of the IAPM — 125

13.6 Activities of the IAPM — 126

Index of Names and cited Authors — 127

Subject Index — 131
