ARTICLE PROCESSING CHARGES

In order to sustain the production of our fully-refereed open access journal, each article accepted for publication in Analysis and Geometry in Metric Spaces is subject to Article Processing Charge (APC). The standard APC amounts to €1000, but for AGMS we currently offer 25% discount on our standard APC to all the authors (APC amounts to €750; further fees reductions are available – please see below). This fee is used to cover the costs of manuscript processing, professional typesetting and copyediting, as well as online hosting, long-term preservation, distribution to libraries and content aggregators worldwide, and extensive promotion to potential readers.

All Authors are encouraged to apply for a waiver or a discount due to the Journal’s extensive waiver and discount policy. All inquiries concerning Article Processing Charges should be addressed before or immediately after submission of a paper to the Journal Editor at the email address agms.editorial@degruyteropen.com.

Information regarding payment of these charges will be provided following acceptance for publication. There are no submission charges – Article Processing Charges apply after the acceptance of a manuscript.

Reviewers are not involved in author payment process and do not discuss charges with authors. The ability to pay does not influence whether or not a manuscript is accepted for publication.

WAIVER POLICIES

If the submitting author is affiliated with an organization which is listed as an Institutional Member, this membership covers the cost of the Article Processing Charge and the author is exempt of any further expenses. However, other authors who do not fulfill these criteria can also request a waiver or a discount during the submission process.

FUNDING OPPORTUNITIES

Authors who are looking for funds to support the payment of Article Processing Charges have a number of options to consider. For details visit our website.
