ARTICLE PROCESSING CHARGES
In order to sustain the production of our fully-refereed open access journal, an article accepted for publication in *Complex Manifolds* is subject to a standard Article Processing Charge of €1000. This fee is used to cover the costs of manuscript processing, professional typesetting and copyediting, as well as online hosting, long-term preservation, distribution to libraries and content aggregators worldwide, and extensive promotion to potential readers.

The standard Article Processing Charge are **discounted by 50% to all authors for the first two years** after the introduction of publication fees. Additionally, the fees can be **totally waived upon agreement with the Editor**.

All Authors can apply for a waiver due to the Journal’s extensive waiver policy, and the **Authors with no funding for publication are not expected to pay**. All inquiries concerning Article Processing Charges should be addressed **before or immediately after submission of a paper** to the Journal Editors at the email address coma.editorial@degruyteropen.com, so the waivers can be reserved in advance.

Information regarding payment of these charges will be provided following acceptance for publication. There are no submission charges – Article Processing Charges apply after the acceptance of a manuscript.

Reviewers are not involved in author payment process and do not discuss charges with authors. The ability to pay does not influence whether or not a manuscript is accepted for publication.

WAIVER POLICIES
If the submitting author is affiliated with an organization which is listed as an **Institutional Member**, this membership covers the cost of the Article Processing Charge and the author is exempt of any further expenses. However, other authors who do not fulfill these criteria can also request a waiver during the submission process.

FUNDING OPPORTUNITIES
Authors who are looking for funds to support the payment of Article Processing Charges have a number of options to consider. For details visit our [website](https://www.degruyter.com/view/j/coma).
