Preface	ix
1 Introduction	1
1.1 What Is a Complex System?	9
1.2 A Brief History of Complexity Science	11
1.2.1 Cybernetics and Systems Theory	12
1.2.2 Dynamical Systems Theory	13
1.2.3 Cellular Automata	15
1.2.4 The Rise of Complexity Science	16
2 Examples of Complex Systems	19
2.1 Matter and Radiation	19
2.2 The Universe	29
2.3 The Climate System	33
2.4 Eusocial Insects	37
2.4.1 Ant Colonies	38
2.4.2 Honeybee Hives	41
2.5 Markets and Economies	45
2.6 The World Wide Web	54
2.7 The Human Brain	57
3 Features of Complex Systems	63
3.1 Numerosity	66
3.2 Disorder and Diversity	68
3.3 Feedback	70
3.4 Non-Equilibrium	71
3.5 Interlude: Emergence	73
3.6 Order and Self-Organisation	76
3.7 Nonlinearity	77
3.8 Robustness	79

3.9	Nested Structure and Modularity	81
3.10	History and Memory	81
3.11	Adaptive Behaviour	82
3.12	Different Views of Complexity	84
4	Measuring Features of Complex Systems	87
4.1	Numerosity	88
4.2	Disorder and Diversity	89
4.3	Feedback	93
4.4	Non-Equilibrium	95
4.5	Spontaneous Order and Self-Organisation	96
4.6	Nonlinearity	99
4.6.1	Nonlinearity as Power Laws	99
4.6.2	Nonlinearity versus Chaos	100
4.6.3	Nonlinearity as Correlations or Feedback	101
4.7	Robustness	101
4.7.1	Stability Analysis	102
4.7.2	Critical Slowing Down and Tipping Points	103
4.7.3	Self-Organised Criticality and Scale Invariance	105
4.7.4	Robustness of Complex Networks	106
4.8	Nested Structure and Modularity	107
4.9	History and Memory	110
4.10	Computational Measures	110
4.10.1	Thermodynamic Depth	111
4.10.2	Statistical Complexity and True Measure Complexity	111
4.10.3	Effective Complexity	114
4.10.4	Logical Depth	115
5	What Is a Complex System?	117
5.1	Nihilism about Complex Systems	117
5.2	Pragmatism about Complex Systems	119
5.3	Realism about Complex Systems	120
5.3.1	Generic Conceptions of Complexity	121
5.3.2	Physical Conceptions of Complexity	122
5.3.3	Computational Conceptions of Complexity	124
5.3.4	Functional Conceptions of Complexity	124
5.4	The Varieties of Complex Systems	126
5.5	Implications	132

Appendix – Some Mathematical Background	135
A Probability Theory	135
B Shannon Information Theory	137
C Algorithmic Information Theory	139
D Complex Networks	140
Bibliography	143
Index	163
