CONTENTS

I: INTRODUCTION AND SUMMARY 1

II: METHODS OF STUDY 10

III: STATISTICAL ANALYSIS OF SELECTED SOCIAL AND ECONOMIC FACTORS 21

IV: MAXIMUM CORRELATIONS AND THE PROBLEM OF CURVILINEAR RELATIONSHIPS 40

V: IMPLICATIONS FOR FURTHER ACTION 45

APPENDIX 49

INDEX 53

TABLES

1. COUNTY GROUP CHARACTERISTICS, 1930 CENSUS 2

2. RELATION OF POPULATION DENSITY TO DELINQUENCY RATES, 1920–1937 3

3. MICHIGAN COUNTIES GROUPED ACCORDING TO POPULATION DENSITY INTO UNITS FOR USE IN CORRELATION ANALYSIS WITH DENSITY OF POPULATION AND RATE OF JUVENILE DELINQUENCY 15

4. HOME CONDITIONS OF BOYS ADMITTED TO BOYS' VOCATIONAL SCHOOL, JULY 1, 1934–JUNE 30, 1937 32
TABLES

5. A Comparison of Linear and Curvilinear Correlation Coefficients 43
6. Geographical Concentration of Delinquent Children in Michigan 49
7. Delinquency Rates for Certain Periods Interrelated by Areas 49
8. Number of Children in Families of Boys Committed to Michigan Boys' Vocational School 50
9. Relation of Delinquency Rates to Employment of Children 50
10. Statistics Used as Socio-Economic Indices 51

FIGURES

I. Levels of Population Density by Counties in Michigan 13
II. How Court Hearings Tend to Vary with Population Density in Nonmetropolitan Counties 17
III. How Delinquency Rates per 1,000 Aged 10–16 Vary with Population Density in New York State 18
IV. Business Cycle Fluctuations in Commitments to State Correctional Institutions, 1895–1938 30
V. How Delinquency and Income Tax Returns Vary Together 42
